

DECEMBER 2023 RECAP

Space Copy®

What's New?

2023 has been a momentous year for Space Copy. We have transformed from a simple startup concept into a thriving company that is changing the game globally as a leader in the emerging market of lunar and extreme environment manufacturing. We want to take a moment and say thank you to all of our advisors, mentors, partners, clients, and supporters for seeing us through the first phase of our journey, as we aspire to grow exponentially in 2024.

Space Copy Incorporates in Canada!

To close out 2023, we are excited to share that we have recently welcomed Space Copy's second headquarters in Canada!

The occasion is sparked by increased interest in additive manufacturing from academia and government in the Great White North, and we are excited to elevate our global reach by partnering with esteemed institutes and bidding on grants with the Canadian Space Agency in 2024.

Space Copy Rebrands Official Site

After a series of technical glitches, we are happy to announce the launch of our new company website! You can now find us at our new and permanent domain: spacecopy.com

Space Copy Pitches For The NASA LSIC Winter Meeting

Space Copy's Founder Madison Feehan was thrilled to present at this December's Lightning Pitch session with the Lunar Surface Innovation Consortium Excavation & Construction focus group. The session gathered a series of subject matter experts, academics, and industry leaders who presented various technologies, all aimed towards in-situ manufacturing using regolith, which truly demonstrates this growing niche industry's revolutionary progress.

Space Copy Bids On NASA's LIFT-1 RFI

Space Copy also was pleased to bid on NASA's Request for Information (RFI) to formulate its future Lunar Infrastructure Foundational Technologies (LIFT-1) demonstration. Led by the Space Technology Mission Directorate (STMD), NASA's primary objective for LIFT-1 is to demonstrate ISRU technologies for future use in the Moon's South Polar region.

Space Copy: As Featured In CEO Weekly

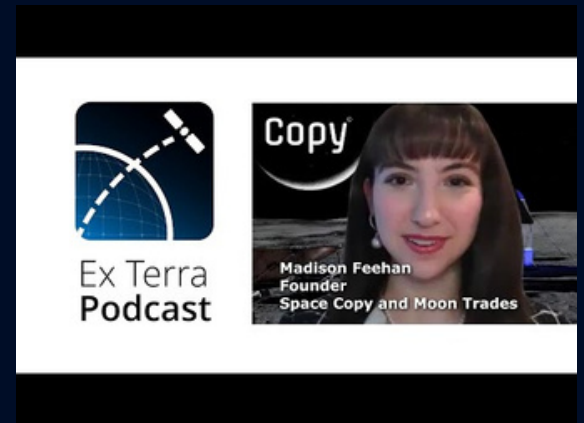

“As humanity charts its course further into the cosmos, the name Space Copy is focused on driving the future of space technology.”

These are the words coined by journalists from CEO Weekly which have just recently featured Space Copy as part of an interview showcasing Madison Feehan, and the innovation that she is curating to help create a paradigm shift in the space industry.

Space Copy: Interview with the Journal of Space Commerce

Featured in the hit episode: “Encouraging Young Entrepreneurs in the Space Industry”; our Founder and COO Madison Feehan had the opportunity to sit down with ExTerra: The Journal of Space Commerce’s own Tom Patton for an exclusive interview, discussing the technology innovations she is part of and highlighting the need for actively engaging youth in STEM and space sciences.

Updates From Singapore: SMU BIG

Space Copy is almost complete its program with Singapore Management University Big Ideas Generator Incubator. We have enjoyed the many networking sessions, mentorship, and masterclasses and we greatly anticipate the upcoming demo day in February 2024!
