

FEBRUARY 2024 RECAP

Space Copy[®]

What's New?

February was a productive and exciting month for the team at Space Copy. While we work with our R&D partners, we are also excited to be featuring Space Copy's future technology development across various conferences, events, and symposiums globally! From Canada, to the US, to Europe, Space Copy's brand is becoming a household name for lunar manufacturing.

Space Copy: Keynote Speaker For VilleAero Conference 2024

To end February, Space Copy took the stage at the 2024 VilleAero Airspace and Logistics Conference, with our CEO Madison Feehan, featured as a panelist alongside major players of Western Canada's aerospace community including: Wyvern, Type5 Ventures, Boeing, Pegasus, Arctic360, Canadian Global Affairs Institute, and more.

We are proud to represent Alberta's growing movement towards sustainable additive manufacturing and spark a new appreciation for the challenges of 3D printing in space.

Making Strides in Canada's Space Economy

Space Copy is spearheading Canada's space manufacturing economy by internationalizing its technology and bringing back home its innovative solutions for terrestrial and extraterrestrial applications. Pictured includes: Charles "Duff" Sullivan, President of Boeing Canada, Yuliia Marcinkowski, Type5 Ventures, Cole Rosentreter, Pegasus, Callie Lissinna, Wyvern, Jessica Shadian, PhD, Arctic360, and Madison Feehan, Space Copy.

Space Copy Attends LunA-10 Enabler Workshop

Space Copy also had the pleasure of attending the 2024 DARPA LunA-10 Enabler workshop, which featured coveted guests from within the space industry, gathered to discuss US-based innovations and how we will sustain a new generation of lunar colonizers. The event was a highlight opportunity to hear the voices of defense and aerospace to best identify how Space Copy's technology fits into the commercial manufacturing framework.

As Featured In: Curious Minds Podcast

Space Copy also received a feature on the latest episode of the Curious Minds Podcast, hosted by Jula He and Beatrice Milasan. The all-female, Canadian podcast features leaders in STEM and entrepreneurship, and in our discussion with CEO Madison Feehan, Curious Minds dived into the realms of how to enter the STEM industry, and identifying and overcoming the challenges of being a female founder.

LIVE: Interview Space Copy x GuideForce

Another feature exposure for February was our CEO's interview with GuideForce's very own Lisa Dreher. The conversation dived into the realm and challenges of entrepreneurship, understand current trends in aerospace, and unlocking the potential value of lunar manufacturing.

Upcoming Features, Speeches, & Events

In Spring 2024, we are excited to have our Founder, Madison C. Feehan, presenting Space Copy's technology and applications for extreme environment manufacturing on Earth and in-space, being featured as keynote speaker at two prestigious industry events:

- Harvard Business School / MIT Sloan - Technology & National Security Conference 2024 - Live in Boston
- Space Resources Week 2024 - Live in Luxembourg

Don't miss Space Copy as we travel worldwide, demonstrating our products, services, technological advantages, and use cases for aerospace, lunar manufacturing, military, defense, and remote construction.

For media inquiries or to nominate Space Copy for future events and conferences, please visit: spacecopy.com and fill in our contact form.

Internships For Summer 2024 Close Soon

We are hiring remote interns for Summer 2024! If you are in a post-secondary STEM discipline of aerospace engineering, software engineering, or computer science, please visit spacecopy.com to get in touch with our team.

Applications are closing on March 31st.
